

Dear Hiring Manager,

I am writing to express my interest in the Trainee Analyst position at Deloitte. I am currently pursuing a B.Tech at IIIT Sri City and have developed a strong foundation in data analysis, SQL, Excel, and Python, along with hands-on experience in translating data into actionable business insights.

During my internship at DRDO, I worked on analyzing large-scale sonar datasets, where I identified data quality issues and evaluated model performance using key metrics such as precision and recall. This experience strengthened my ability to approach real-world problems analytically and derive meaningful insights from complex data.

In addition, my projects have focused on solving business-oriented problems using data. For example, in a customer behavior analysis project, I built an end-to-end pipeline and developed Power BI dashboards to track key metrics such as revenue trends and customer patterns. In another project, I analyzed user behavior and defined product metrics to improve engagement and optimize user flow in a marketplace platform.

I am particularly interested in Deloitte because of its strong focus on data-driven decision-making and solving business challenges at scale. I am eager to contribute my analytical skills, problem-solving mindset, and willingness to learn in a fast-paced consulting environment.

Thank you for your time and consideration. I would welcome the opportunity to discuss how my skills and experiences align with the role.

Sincerely,
Amit Kumar
