

Amit Kumar

MERN Stack Developer | Full-Stack JavaScript/TypeScript Engineer
+91 8669223920 | amitk200703@gmail.com | [LinkedIn](#) | [Github](#) | [leetcode](#) | [portfolio](#)

Profile

Full-stack JavaScript/TypeScript developer with hands-on **MERN stack** experience — building responsive **React.js** interfaces, **Node.js/Express.js** REST APIs, and **MongoDB**-backed applications. Additional experience with real-time systems (Socket.IO, WebRTC), secure authentication (JWT, OAuth, RBAC), and payment integrations (Stripe). Comfortable debugging, testing, and collaborating with cross-functional teams in a remote setup.

Education

Indian Institute of Information Technology, Sri City *Andhra Pradesh, India*
B.Tech in Electronics and Communication Engineering **CGPA: 7.81/10 | Graduated: August 2026**

Experience

Rajasthan Government School — Freelance Project Aug – Sept 2025
Full-Stack Development | Rajasthan, India | [Code](#) | [Live](#)

- Independently designed, built, and deployed a **full-stack school management system** with a React frontend and Node.js backend, hosted on AWS EC2.
- Implemented **JWT-based authentication with RBAC** for secure access control.
- Optimized backend performance using indexing and pagination, reducing response time by **15%**.

Projects

Meal-Monkey *MongoDB | Express.js | React.js | Node.js | Redis | Docker* | [Code](#) | [Live](#)

- Developed a **scalable full-stack food delivery platform** using the **MERN stack** (MongoDB, Express.js, React.js, Node.js) with JWT authentication, RBAC, and secure order workflows.
- Built **REST APIs** for cart management, order processing, and real-time order tracking, improving API response time by **30%** through Redis caching, database indexing, and pagination.
- Performed load and API testing using **Artillery and Postman**, increasing backend request-handling efficiency by **20%**.

Books Unbound – Full-Stack E-Commerce Platform *React | Redux Toolkit | Node.js | Express.js | MongoDB | Stripe* | [Code](#) | [Live](#)

- Architected a responsive **full-stack e-commerce platform** using **React, Redux Toolkit, and Tailwind CSS**, with dynamic catalog search/filtering and centralized state management for cart and wishlist workflows.
- Engineered modular **REST APIs and MongoDB (Mongoose) schemas** using **Node.js and Express.js** across multi-item orders, inventory, and user reviews, with query optimization and data validation.
- Implemented secure authentication with **JWT, Google OAuth 2.0, and Bcrypt**, enforcing **Role-Based Access Control (RBAC)** between Admin and customer privileges, plus Stripe payments and Twilio/OTP delivery verification.

FlowTalk – Real-Time Messaging Platform *React | TypeScript | Node.js | Express | Socket.IO | WebRTC* | [Code](#)

- Built an **event-driven real-time messaging system** with **Node.js, Express, and Socket.IO**, supporting room-based chat, multi-tab presence tracking, typing indicators, and WhatsApp-style delivery/read receipts.
- Implemented **peer-to-peer video/voice calling** using **WebRTC** signaling over WebSockets, with a hardened **JWT** auth pipeline and a responsive **React/Next.js** frontend.

Technical Skills

- MERN Stack:** MongoDB (Mongoose), Express.js, React.js, Node.js, REST APIs
- Languages:** JavaScript, TypeScript, Python, Java
- Frontend:** React.js, Next.js, Redux Toolkit, Responsive Design, HTML5, CSS3, Tailwind CSS
- Backend & Real-Time:** Express.js, Node.js, REST APIs, Socket.IO, WebRTC, WebSockets
- Databases:** MongoDB, PostgreSQL, MySQL, Redis, SQL
- Auth & Security:** JWT, OAuth 2.0, RBAC, Bcrypt
- Tools & Cloud:** Git, GitHub, Docker, AWS, CI/CD, Postman
- Core CS:** Data Structures & Algorithms, OOP, DBMS, System Design

Achievements

- Solved 400+ DSA problems with strong focus on optimization and edge cases.
- Independently built and deployed multiple full-stack MERN applications end-to-end using Docker, Redis, MongoDB, and AWS.
