

Amit Kumar

Software Engineer | Full-Stack Developer | Backend Developer
+91 8669223920 | amitk200703@gmail.com | [LinkedIn](#) | [Github](#) | [leetcode](#) | [portfolio](#)

Profile

Software Engineering graduate with hands-on experience building, testing, and deploying full-stack applications across frontend, backend, REST APIs, databases, and cloud-first systems (AWS, Docker, CI/CD). Comfortable writing clean, maintainable code in Java, Python, and JavaScript/TypeScript, debugging issues, and following structured SDLC and Agile-style workflows. Proven track record of independently shipping production-ready applications end-to-end and collaborating with cross-functional teams.

Education

Indian Institute of Information Technology, Sri City *Andhra Pradesh, India*
B.Tech in Electronics and Communication Engineering **CGPA: 7.81/10 | Graduated: August 2026**

Experience

AI/ML Research Intern — Defence Research and Development Organisation (DRDO) May – July 2025
Visakhapatnam, Andhra Pradesh | [Kaggle](#) | [Report](#)

- Wrote and maintained **Python code** for data preprocessing, model evaluation, and inference automation on an 8,000+ image dataset.
- Debugged and tested** detection pipelines, improving inference efficiency and reducing processing latency.
- Collaborated with a **cross-functional research team**, following structured testing and review practices before deployment.

Rajasthan Government School — Freelance Project Aug – Sept 2025
Full-Stack Development | Rajasthan, India | [Code](#) | [Live](#)

- Independently designed, built, and deployed a **full-stack school management system** on AWS EC2.
- Implemented **JWT-based authentication with RBAC** for secure access control.
- Optimized backend performance using indexing and pagination, reducing response time by **15%**.
- Set up **CI/CD pipelines using GitHub Actions** for automated build and deployment.

Projects

Meal-Monkey *MongoDB | Express.js | React.js | Node.js | Redis | Docker* | [Code](#) | [Live](#)

- Developed a **scalable full-stack food delivery platform** using the MERN stack with multi-role authentication.
- Built **REST APIs** for order management, cart handling, and real-time order tracking.
- Tested and debugged** backend APIs using Postman, with structured exception handling and Redis-based performance tuning.
- Implemented JWT authentication, RBAC, and Dockerized deployment for secure, maintainable services.

MiniTrello – Task Tracker *Java | Spring Boot | React.js | MySQL | H2* | [Code](#)

- Built a **full-stack Task Tracker** using Java/Spring Boot and React, implementing RESTful APIs with complete CRUD functionality.
- Developed backend services using **Spring Data JPA**, supporting filtering, search, and structured exception handling.
- Integrated frontend with backend using **Axios**, enabling dynamic UI updates and real-time task management.
- Followed **clean code practices** and modular architecture for maintainable backend development.

Campus-Connect *React.js | Flask | MongoDB | OpenCV | Scikit-learn* | [Code](#) | [Live](#)

- Built a **full-stack campus platform** integrating a React frontend with Flask APIs for marketplace and lost & found modules.
- Designed **scalable MongoDB schemas** and implemented secure JWT-based authentication.
- Wrote unit tests for APIs** to ensure reliability and maintainable code, following TDD practices.

Technical Skills

- Languages:** Java, Python, JavaScript, TypeScript, C++
- Backend & Frameworks:** Spring Boot, Node.js, Express.js, FastAPI, REST APIs
- Frontend:** React.js, HTML5, CSS3
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, SQL
- Tools & Cloud:** Git, GitHub, Docker, Linux, AWS, CI/CD, Postman
- Practices:** SDLC, Agile/Scrum familiarity, Unit & API Testing, Debugging, Code Review
- Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Achievements

- Solved 400+ DSA problems with strong focus on optimization and edge cases.
- Independently built and deployed multiple full-stack applications end-to-end using Docker, Redis, PostgreSQL/MySQL, and AWS.
